Reasons For Allowance

Claims 1 - 30 are allowable.

1. The following is an examiner's statement of reasons for allowance: in combination with other limitations of the claims the prior arts made of record fail to suggest an apparatus and method for increased data throughput of digital media recorders comprising a plurality of compression paths configured to compress and buffer digital data to provide a plurality of compressed data streams and at least one media encoder configured to concurrently encode the plurality of compressed data streams on a plurality of media tracks. Also, in combination with other limitations of the claims the prior arts made of record fail to suggest an apparatus and method for increased data throughput of digital media recorders comprising a plurality of decompression paths configured to concurrently decompress and buffer a plurality of compressed data streams to provide a plurality of decompressed data streams.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

2. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

3. O'Brien et al. (US Patent Number 4,929,946) discloses an adaptive data compression apparatus including run length encoding for a tape drive system.

4. MacLean, Jr. et al. (US patent Number 5,109,226) discloses a parallel processors sequentially encoding/decoding compaction maintaining format compatibility.

5. Laksono (US Application Number 09/990,976) discloses a system and method for multiple channel video transcoding.
